

Amazing Outdoor Art

Aims:

- to get outside for some fresh air
- to appreciate nature
- to experiment with natural materials
- to take a moment to be mindful
- to develop photography skills

Resources can be collected from your back garden or you could go for a walk to collect them.

Activity 5

**Find some leaves.
Work out where the
line of symmetry is.
Cut the leaves in half
and place them on a
piece of paper. Draw
the other half of the
leaf as accurately as
you can, adding detail.**

Extension: imagine you are a botanist (plant scientist) and have discovered a new species of leaf that has multiple lines of symmetry. Draw it and describe where you found it.

Mindful moment: take a careful look at the veins in the leaves. Can you find a similar pattern anywhere on the palm of your hand? Trace the lines on your palm, then close your eyes and think about how unique you are.
